

IGP SALES ANALYSIS DASHBOARD

Project Problem Statement

ABOUT IGP

IGP (Indian Gifts Portal) is a leading gifting and celebration-focused e-commerce company specializing in delivering gifts for various occasions such as Diwali, Raksha Bandhan, Valentine's Day, Birthdays, Anniversaries, Mother's Day, Father's Day, Christmas, and New Year.

The dataset contains information about products, orders, customers, occasions, and relevant order dates. The objective is to analyze sales performance, customer purchasing behavior, occasion-wise demand, and product popularity.

An interactive Excel dashboard will be created to answer key business questions and provide actionable business insights.

KEY BUSINESS QUESTIONS

1. Total Revenue – Identify the total revenue generated.
2. Average Order and Delivery Time – Evaluate the average time taken between order placement and delivery.
3. Monthly Sales Performance – Analyze sales trends across different months.
4. Top Products by Revenue – Determine the highest revenue-generating products.
5. Customer Spending Analysis – Understand average customer spending behavior.
6. Sales Performance of Top 5 Products – Compare the revenue performance of top products.
7. Top 10 Cities by Number of Orders – Identify cities generating the highest order volumes.
8. Order Quantity vs Delivery Time – Analyze whether larger orders impact delivery timelines.
9. Revenue Comparison Between Occasions – Compare revenue generated across different occasions.
10. Product Popularity by Occasion – Identify the most popular products for each occasion.
